

Montagna et al., 10/696342

Amdt., p. 12

components are akin if not the same as the components and features of the Darbishire system such as cross-members 120, welds 128, inside roller bearing wheels 151 and so forth.

REPLACE the abstract on page 18 with the following:

ABSTRACT OF THE DISCLOSURE

A pull out system, or a pull out drawer system for vehicles and ~~trailers, which, for instance, can include a stationary rail having a first set of rollers mounted thereon, the rail adapted for receiving a second set of rollers, and a movable rail having the second set of rollers mounted thereon, wherein the movable rail is mounted to the rail with rolling contact both between the first set of rollers and the movable rail and between the stationary rail and the second set of rollers, or which, for instance, can include a stationary mounting frame having a set of parallel rails having a first set of rollers mounted thereon, the set of rails adapted for receiving a second set of rollers, and a subcombination having a movable mounting frame having the second set of rollers mounted thereon, and a load-bearing surface mounted to the movable frame, the movable frame and load-bearing surface subcombination mounted to the stationary mounting frame with rolling contact both between the first set of rollers and the movable frame and between the set of parallel rails and the second set of rollers,~~ trailers can be improved by ~~at least one of the following: as the stationary rail(s) an inverted French F-channel as a stationary rail; as the movable rail(s) an inverted U-channel as a movable rail; and among the rollers, at least one being and/or a cam-follower bearing being present~~

Montagna et al., 10/696342

Amdt., p. 13

among rollers on the rails. Also, a movable frame for a pull out drawer system can be improved by providing a support member for supporting a slide-in/out accessory, for example, a drawer or a ramp, and further by providing the accessory with such a frame.

formally amended to insure that the word, measure, is present in the paragraph kindly noted by the Examiner. The abstract has been amended to render it to be less than 150 words.

As may apply to the present claims, the rejection of claims 1-4, 11-22, 26-28 under 35 USC 102(b) over Darbishire, US 6328364, is respectfully traversed. There is no written description or drawing in that patent which describes the inverted French F-channel, to include its stabilizing base foot, as was later admitted on page 3 of the outstanding action; which describes the inverted U-channel, to include its depending, rail-aligning portion, which extends downwardly substantially the same distance as does its bearing-mounting portion; nor which describes the cam-follower bearing -- as required in base claim 1 and those claims dependent on it. Nor is there a disclosure of a movable mounting frame with a support member for supporting a slide-in/out accessory that can slide in and slide out relative to the movable mounting frame as required further in claim 15 or otherwise found in claim 26, much less the accessory itself as in claims 16 and 27, which is a drawer as in claim 28.

Montagna et al., 10/696342

Amdt., p. 16

in a direction of its length. New claim 31 requires a movable frame as of claim 27, which is for a cargo area of a vehicle or trailer, and is connected to a stationary frame as part of the pull out drawer system. New claim 32 requires a movable frame as of claim 31, which further includes a load-bearing surface mounted on top of the movable frame so that the load-bearing surface remains fixed in relation to the movable frame. No such embodiment is found in the art of record, to include that of Darbishire, Tognetti, and Clark et al., nor Gehman et al.

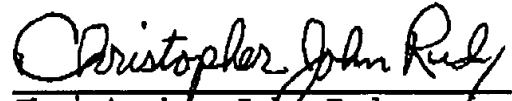

Please indicate Examiner approval of the formal drawings.

The present application is in condition for allowance. Yet, the Examiner is invited to call the undersigned to discuss the case, or to seek authorization for an Examiner's amendment.

The Examiner's assistance in formulating claims he would deem allowable is requested if this amendment falls short in his eyes.

A Notice of Allowance is solicited.

Respectfully,

Christopher John Rudy
